

40m Lattice Tower Maintenance & Inspection Log

Island Installation Protocol - Marine Environment

1. General Inspection Information

Tower ID / Asset Number	Device-116
Location / Island Name	Remote Island
GPS Coordinates	N/A
Inspection Date	2026-02-10
Inspector Name(s)	Alex
Weather Conditions	Clear, Wind: Moderate
Tide Information	Low Tide

2. Pre-Inspection Safety & Environmental Briefing

This checklist must be completed before any work or climbing commences.

Item	Check Point	Status	Comments
2.1	Site Access Assessment (Tide, Sea Conditions)	☐ Pass	
2.2	Emergency Action Plan Review	☐ Pass	
2.3	PPE Check (Harness, Helmet, Life Vests)	☐ Pass	
2.4	Weather Forecast Review (48h)	☐ Pass	
2.5	Communication Equipment Test	☐ Pass	

3. Structural Inspection

☐	Tower legs and bracing members (corrosion, damage)
☐	Bolts and connections (torque, wear)
☐	Foundation and anchor bolts
☐	Ladder and safety cable
☐	Antenna mounting brackets
☐	Guy wires and turnbuckles (if applicable)
☐	Platform and walking surfaces

4. Maintenance Work Performed

Clean-Up	
Hours Spent: 2 hours	
Overall Status:	Pass

5. Electrical & Grounding System

☐	Ground rod connections - check for corrosion
☐	Lightning arrestor inspection
☐	Cable entry seals and waterproofing
☐	Power supply and battery backup
☐	Equipment shelters/cabinets (ventilation, seals)

6. Antenna & RF Equipment

☐	Antenna alignment and orientation
☐	Radome condition (if applicable)
☐	Feedline and connectors
☐	Waveguide pressurization system
☐	RF equipment functionality test

7. Environmental & Corrosion Assessment

Marine environment requires special attention to corrosion. All metal surfaces should be inspected for rust, pitting, and coating degradation.

☐	Galvanized coating condition
☐	Sacrificial anodes (if applicable)
☐	Paint/coating condition
☐	Dissimilar metal contact points
