

40m Lattice Tower Maintenance & Inspection Log

Island Installation Protocol - Marine Environment

1. General Inspection Information

Tower ID / Asset Number: Brother Printer-172

Location / Island Name: 1600 Amphitheatre Pkwy, Mountain View, California, United States

GPS Coordinates: N/A

Inspection Date: 2026-02-27

Inspector Name(s): Alex

Company / Organization: N/A

Weather Conditions: Temp (°C): _____, Wind (km/h, Dir): _____, Precipitation: _____, Sea State: _____

Time On-Site / Off-Site: _____ / _____

2. Pre-Inspection Safety & Environmental Briefing

This checklist must be completed before any work or climbing commences. The remote and marine nature of this site requires heightened safety and environmental awareness.

Item	Check Point	Status	Comments / Observations	Action Taken
2.1	Site Access Assessment (Tide, Sea Conditions, Landing Zone Safety)	Pass Fail		
2.2	Emergency Action Plan (EAP) Review (Medevac, Communication Plan, First Aid)	Pass Fail		
2.3	Personal Protective Equipment (PPE) Check (Climbing Harness, Lanyards, Helmets, Life Vests, Boots)	Pass Fail		
2.4	Tools & Equipment Check (Torque Wrenches, Test Meters, Cleaning Supplies)	Pass Fail		
2.5	Environmental Protection Measures (Spill Kits, Waste Containment)	Pass Fail		

3. Site & Foundation Inspection

Focus on impacts from the marine environment, including erosion, saltwater corrosion, and foundation stability.

Item	Inspection Point	Status	Comments / Observations	Action Required
3.1	Site Access Path / Landing Area	Pass Monitor Fail N/A		
3.2	Perimeter Fence, Gate, and Signage	Pass Monitor Fail N/A		
3.3	Ground Condition & Vegetation Control	Pass Monitor Fail N/A		
3.4	Evidence of Coastal Erosion or Scouring near Foundation	Pass Monitor Fail N/A		
3.5	Concrete Foundation Blocks/Piers	Pass Monitor Fail N/A		
3.6	Anchor Bolts, Nuts, and Base Plates	Pass Monitor Fail N/A		
3.7	Site Drainage	Pass Monitor Fail N/A		

Maintenance Work Performed

General Check

Parts Replaced:

-

Hours Spent: 1 hours

Additional Comments:

General Check

Overall Status: Pass

4. Structural Integrity (Lattice Members & Connections)

A thorough visual and tactile inspection is required. Pay close attention to signs of corrosion, which is accelerated in marine environments.

Item	Inspection Point	Status	Comments / Observations	Action Required
4.1	Tower Plumb and Alignment	Pass Monitor Fail N/A		
4.2	Main Leg Members	Pass Monitor Fail N/A		
4.3	Horizontal and Diagonal Bracing	Pass Monitor Fail N/A		
4.4	Bolts, Nuts, and Washers	Pass Monitor Fail N/A		
4.5	Welded Connections	Pass Monitor Fail N/A		
4.6	Surface Coating / Galvanization	Pass Monitor Fail N/A		
4.7	Salt Crystal Accumulation	Pass Monitor Fail N/A		

5. Climbing & Safety Systems

Safety systems must be in perfect working order. Corrosion can severely compromise their integrity.

Item	Inspection Point	Status	Comments / Observations	Action Required
5.1	Climbing Ladder / Step Pegs	Pass Monitor Fail N/A		
5.2	Vertical Safety Cable / Rail System	Pass Monitor Fail N/A		
5.3	Safety System Anchor Points	Pass Monitor Fail N/A		
5.4	Rest Platforms and Handrails	Pass Monitor Fail N/A		

6. Antenna, Coaxial Cable & Ancillary Systems

Inspect all mounted equipment for security and weather resistance, which are critical in high-wind, high-moisture environments.

Item	Inspection Point	Status	Comments / Observations	Action Required
6.1	Antenna Mounts and Hardware	Pass Monitor Fail N/A		
6.2	Antenna Condition (Radomes, Seals)	Pass Monitor Fail N/A		
6.3	Coaxial Cable / Waveguide Condition	Pass Monitor Fail N/A		
6.4	Connector Weatherproofing	Pass Monitor Fail N/A		
6.5	Cable Trays and Supports	Pass Monitor Fail N/A		

7. Grounding & Lightning Protection System

Essential for safety and equipment protection on an exposed island. The saline environment can impact both corrosion and grounding effectiveness.

Item	Inspection Point	Status	Comments / Observations	Action Required
7.1	Air Terminal / Lightning Rod	Pass Monitor Fail N/A		
7.2	Down Conductors	Pass Monitor Fail N/A		
7.3	Grounding Connections (Exothermic Welds, Lugs)	Pass Monitor Fail N/A		
7.4	Ground Ring / Rods (Visible Portions)	Pass Monitor Fail N/A		
7.5	System Resistance Test (if performed)	Pass Monitor Fail N/A		

8. Aviation Obstruction Lighting & Ancillary Equipment

Item	Inspection Point	Status	Comments / Observations	Action Required
8.1	Aviation Light Fixtures	Pass Monitor Fail N/A		
8.2	Light Functionality (Day/Night Mode)	Pass Monitor Fail N/A		
8.3	Equipment Shelter / Cabinets	Pass Monitor Fail N/A		
8.4	Power Systems (Solar Panels, Generator, Batteries)	Pass Monitor Fail N/A		

9. Inspection Summary & Recommendations

Overall Tower Condition Assessment & Narrative Summary:

General Check

Parts Replaced:
-

Hours Spent: 1 hours

Additional Comments:
General Check

Overall Rating: ☐ Good - No significant issues found. ☐ Fair - Minor issues, requires monitoring. ☐ Poor - Significant issues. ☐ Critical

High-Priority Action Items Summary:

10. Inspector Sign-Off
